CAPE & ISLANDS GLASS

# A new way to treat glass and granite

**By Scott Gladish**

What can your home or boat have in common with the California Academy of Science, the Barcelona Convention Center in Spain, Caesar's Palace in Atlantic City, Nike's headquarters or the Monterray Bay Aquarium?

Two words: DIAMON-FUSION®

This state-of-the-art nanotechnology treatment - which reacts with all silica-based surfaces such as glass, ceramic tile, granite and porcelain - also reduces maintenance, as well as cuts down on harsh chemicals. It now is available to homeowners for everything from outside windows to shower doors to granite countertops. It is available through Cape & Islands Glass, which is the only licensee in Southeast Massachusetts.

DIAMON-FUSION® is particularly popular in places like Cape Cod, where wind batters windows, and so many residents can treat their boats to battle salt spray.

At home, gone are the days of the squeegee. Once treated with DIAMON-FUSION®, you can wipe down windows and shower doors simply by rinsing or using a body sponge.

Cape & Islands Glass has found DIAMON-FUSION® particularly useful for glass shower enclosures, a fast-growing trend in remodeling. Keeping ordinary shower doors looking fresh can be an arduous task at best.

DIAMON-FUSION® can be wiped on or spayed on. The process has a lifetime warranty, and Cape & Islands Glass goes a step further, offering a no-questions-asked money-back guarantee if a customer is not satisfied.

At the same time, the process is not a miracle. It's more like Teflon® for cooking pans. While you can cook food in uncoated pans, it is so much easier to clean if you cook with Teflon® coated pans. While you still must maintain your DIAMON-FUSION® coated surface, the time and effort required are significantly reduced.

Maintenance time and expense is guaranteed to be reduced by as much as 50 percent and often up to 90 percent. Equally important–especially for an environmentally sensitive place like the Cape - DIAMON-FUSION® eliminates the need for any harsh, toxic chemical cleaning sprays.

Prices for treatment are based on square footage. There also is a less-expensive CLEAR FUSION® treatment that you can apply yourself. We encourage you to call or visit us at Cape & Islands Glass to learn more.
